

Homework Assignment 0 – due on Friday, September 6 (Midnight)

Check login and write a simple program

0. Install *Xshell* or *MobaXterm* on your PC if not installed.
1. Login *10.50.111.81* with your id(csxx) and password(csxx) (the password is initially same as the login ID)

* if you are not in campus, access the VPN server first.

2. check that you login correctly using the *finger csxx* command
3. Change your password using the *passwd* command.
4. Design a C program that adds two integers.

(suppose that the program name is *add.c*)

(1) Write a program with vi (*vi add.c*) * you may use the “nano” program.

(2) Compile the program (*cc add.c -o add*)

* cc is the C compiler.

(3) Test the compiled program (*add 3 4 = > 7*)

5. Submit the C program using the *turnin* command.
6. Logout hpc.gwnu.ac.kr using one of the next commands.

logout or *exit* or *ctrl+D*

Prerequisite – C language and Unix(Linux) knowledges(e.q. *vi*)
